Subject: Motivation Letter for Membership in the International Society of Biofabrication

Dear ISBF board,

I am delighted to express my interest in becoming a member of the ISBF. As a dedicated and aspiring professional in the field of tissue engineering and biofabrication, I believe that joining this esteemed community of researchers and experts would provide me the opportunity to contribute to the advancement of biofabrication.

Upon reflecting on my academic journey, I have been passionate to explore innovative approaches in bioprinting of tissue analogous for broad applications in tissue regeneration and disease modeling. My experiences have allowed me to grasp the tremendous potential of 3D bioprinting methods in addressing complex challenges in peripheral nerve regeneration, cardiovascular disease modeling and cancer modeling. The ISBF, with its multidisciplinary membership and cutting-edge research initiatives in the field, presents a platform for networking and knowledge exchange. Being a part of this organization would not only enhance my professional growth but also provide an opportunity for me to contribute meaningfully to the advancement of biofabrication. As a junior faculty member in the Mechanical Engineering Department at Cleveland State University, I am dedicated to fostering the development of biofabrication community by expanding its influence in the local area of Ohio. I am eager to engage in collaborative projects and contribute to ISBF's mission of promoting education and research. Building upon my expertise, I am confident in offering unique perspectives and skills that can complement ongoing efforts.

I envision gaining insights into the latest advancements and best practices in the biofabrication field, and have been following the notable achievements made by ISBF's members, which further inspire my desire to be associated with this distinguished group. In closing, I am enthusiastic about the potential synergy that my membership would bring to the community. I look forward to actively participating in events and conferences that promote the exchange of ideas in biofabrication and its applications, and serving the development of ISBF by facilitating research collaborations and any other relevant events.

Thank you for considering my application for membership.

Sincerely,

Liqun Ning, Ph.D.
Assistant Professor
Mechanical Engineering and Chemical/Biomedical Engineering
Cleveland State University
